Regional Market Committees Mission Statement:

The statewide CRMCA mission for marketing is to expand awareness and educate specifiers, contractors, decision makers, and members regarding the full capabilities, benefits, and innovations of concrete which will stimulate and build increasing momentum for the usage and expansion of the concrete scope of construction. This would be accomplished, with a unified approach, primarily through localized Market Committees involved in educational seminars and training sessions promoting new or proven technology and methods regarding the benefits of constructing with concrete.

Technical Committee Mission Statement:

The mission of the CRMCA Technical Committee is to continuously improve the basic and innovative concrete technologies in Colorado. The objectives are to provide oversight and guidance in the areas of education and research, technical support, and specifications, ACI and other industry related certifications, partnership with CDOT and to assist other committees or groups to accomplish objectives for the betterment of the Colorado ready mixed industry.

Joint Governmental Affairs Committee Mission Statement:

The mission of the Governmental Affairs Committee is to promote the growth and development of the Colorado aggregate and concrete industries through the advocacy of positive and permanent business friendly government laws and regulations; effective communication with our elected officials; and development of strategic partnerships to accomplish these objectives.

Land Use & Environmental Committee Mission Statement:

The mission of the CSSGA's Land Use and Environmental Committee is to proactively identify and take appropriate action on issues deemed important to existing and future operations of CSSGA members. The Committee is dedicated to advancing and encouraging Colorado's aggregate construction industries; providing information on legislative matters to the membership; building and enhancing positive relationships with regulatory and governmental agencies; and creating a better understanding among the citizens of Colorado regarding the importance of the aggregate mining industry.

Joint Safety Committee Mission Statement:

The Joint Safety Committee promotes excellence in safety and health by developing and implementing programs to meet the unique needs of the Aggregate and Ready Mixed Concrete industries; disseminate information on regulatory compliance and administration of health and safety programs, including training; providing operational input on safety and health issues to MSHA & OSHA as required; communicating and working with other committees in CRMCA & CRMCA, as well as NRMCA, NSSGA and other state association partners.
